

BUS AIR CONDITIONING SYSTEMS

PKN Philosophy in 'Connecting aspirations', by offering innovative mobility solutions that are in line with customers' aspirations.

Established in the Year 2001 to demonstrate to the value of interior design in commercial vehicles. Driven by innovative ideas and passion to excel, the team started off with FRP Moulding of various parts required by various bus body builders. With the introduction of Traveller on the Indian roads by Force Motors, PKN was the only company to modify it and customize interiors of these travellers with innovative designs and concepts. Those innovative ideas and concepts were instrumental in turning around the travel needs of schools, International and domestic tourists using smaller compact vehicles.

Global warming and poor air quality increased the demand of Air Conditioners in commercial vehicles. Manufacturers of air conditioners tried various permutation and combinations to suit the requirement of travelers, but nothing seemed to work as a perfect fit, PKN is the only enterprise accredited with the capability of providing a trouble free air conditioning solution for travellers.

Today PKN Air Conditioners are the most preferred choice of customers. PKN offers Air Conditioning solution for all variants of travellers such as 12, 17, 21 and 26 seats irrespective of being driven on CNG/DIESEL.

Trax Cruiser/ Traveller Ambulance

Unit Name	-	PKN Trax AC
Cooling Capacity	-	8 KW
Power Consumption	-	25 Amp
Compressor Capacity	-	135 CC
Refrigerant	-	HFC-R 134a

Traveller 3350/3700 WB

Unit Name	-	PKN T AC
Cooling Capacity	-	12 KW
Power Consumption	-	50 Amp
Compressor Capacity	-	175 CC
Refrigerant	-	HFC-R 134a

Traveller 3050 WB

Unit Name	-	PKN S AC
Cooling Capacity	-	10 KW
Power Consumption	-	35 Amp
Compressor Capacity	-	135 CC
Refrigerant	-	HFC-R 134a

Traveller 4020 T2

Unit Name	-	PKN T2 AC
Cooling Capacity	-	17 KW
Power Consumption	-	71 Amp
Compressor Capacity	-	225 CC
Refrigerant	-	HFC-R 134a

Traveller 4020 T1

Unit Name	-	PKN T1 AC
Cooling Capacity	-	15 KW
Power Consumption	-	50 Amp
Compressor Capacity	-	175 CC
Refrigerant	-	HFC-R 134a
